collecting and analyzing longitudinal public opinion data

Data Collection

U. S. based public opinion data should be collected via telephone survey.

The data will be collected via telephone survey to measure trends in attitudes of the American public.

Documentation and Metadata

The Interview data will be collected using computer-assisted telephone interviewing (CATI) software. In addition, the required information and metadata are:

1. Personal information of interviewees.
2. Recording all answered questions by interviewees.

The responses will be stored in a centralized database on a secure server hosted in the PI's department. the metadata will enhanced with descriptive DDL metadata.

Ethics and Legal Compliance

rules and regulations that will govern the protection of human subjects. including securing datasets that contains personally identifiable information in order to protect against confidentiality breaches.

the security measures will take place to file encryption, password protection, and access restriction.

Storage and Backup

The Interview data will be collected using computer-assisted telephone interviewing (CATI) software. The data will be stored in centralized database and it backs up content daily.

The security measures will take place to file encryption, password protection, and access restriction.

Selection and Preservation

The public-use version of the data that has been fully de-identified to be transferred to the American Public Opinion Archives.

Producing a public-use version of the data that has been fully de-identified to be transferred to the American Public Opinion Archives, where the data will be preserved, enhanced with descriptive DDI metadata, and made available online.

Data Sharing

public-use version will be published online.

the public-use version of the data will be made available after an embargo period of 1 year to allow the PI first use rights of the data.

Responsibilities and Resources

Principal Investigator (PI) will responsible for data management.

PI will include data management costs in the project budget.
