Project abstract:

This research project investigates wellbeing, self-oriented and prosocial behaviour among adolescents and students in Rotterdam, the Netherlands during the pandemic COVID-19 crisis. This project consists of two major components: 1) a sub-project focusing on EUR (Erasmus University Rotterdam) students and 2) a sub-project focusing on adolescents living in the Rotterdam area. For both projects, participants were asked to report on their wellbeing, experiences and behaviors during the pandemic COVID-19 crisis on Mondays - Fridays, for two consecutive weeks (i.e., in the form of daily diaries). The larger project is expected to result in several research articles, that all answer different research questions. In these articles, research questions will be answered for the students and adolescents separately.
