

# European Research Council (ERC): ERC DMP

## Summary

Project Acronym

Project Number

Provide a dataset summary

*Guidance:*

This should include a dataset reference and name; origin and expected size of the data generated/collected; data types and formats.

Several datasets may be included into a single DMP

## FAIR data and resources

### 1. Making data findable

*Guidance:*

This should consider the dataset description: metadata, persistent and unique identifiers e.g., DOI

### 2. Making data openly accessible

*Guidance:*

This should consider which data will be made openly available and if some datasets remain closed, the reasons for not giving access; where the data and associated metadata, documentation and code are deposited (repository?); how the data can be accessed (are relevant software tools/methods provided?)

### 3. Making data interoperable

*Guidance:*

Which standard or field-specific data and metadata vocabularies and methods will be used

### 4. Increase data reuse

*Guidance:*

Consider what data will remain re-usable and for how long, is embargo foreseen; how the data is licensed; data quality assurance procedures

### 5. Allocation of resources and data security

*Guidance:*

Consider the estimated costs for making the project data open access and potential value of long-term data preservation; procedures for data backup and recovery; transfer of sensitive data and secure storage in repositories for long term preservation and curation
